

MEDIA RELEASE

Subject: **New Emergency Dashboard for the Rural City of Murray Bridge community**

Contact: **Heather Barclay | Chief Executive Officer**
media@murraybridge.sa.gov.au

Date: **Wednesday 26 August 2026**

The Rural City of Murray Bridge has launched a new Emergency Dashboard to help residents, businesses and visitors access important emergency information quickly and easily during emergencies and severe weather events.

Available through Council's website, the Emergency Dashboard provides a central location that brings together information from trusted emergency and government sources, helping the community stay informed through a single, easy-to-access dashboard.

The dashboard displays any emergency warnings and alerts, weather updates, road conditions and closures, and other relevant community information during active events.

The Emergency Dashboard has been designed to be mobile-friendly and accessible across a range of devices, allowing users to quickly access information whether at home, at work or travelling.

A similar system has already been rolled out in other Council areas across Australia, with great success and positive feedback from the community.

The launch of the dashboard forms part of Council's ongoing commitment to community safety, preparedness and resilience - by improving access to reliable emergency information for the Murray Bridge community.

Residents are encouraged to familiarise themselves with the Emergency Dashboard and save the link to their device for easy access when required.

🔗 **View the Emergency Dashboard:** <https://emergency.murraybridge.sa.gov.au/>

Note: This webpage displays information obtained from external official sources, including SAFECOM, the SA Country Fire Service (CFS) and the SA State Emergency Service (SES).

Information is provided for general informational purposes only and may be delayed, incomplete, inaccurate or subject to change without notice.

While reasonable efforts are made to display current information, do not rely solely on this webpage for emergency warnings or safety decisions.

For the latest and most up-to-date emergency information, warnings and advice, refer directly to official sources by clicking in the links to the official sources listed on the dashboard.

In an emergency or where there is an immediate threat to life or property, **call 000**.
