Sixth Street Revitalisation

Community Update Number 17 November 2016

Construction Update

Construction of the concrete pavements is underway in Zone 4 (outside the Art Gallery) whilst the new charcoal feature concrete at the intersection of Sixth Street and Fifth Street has recently been completed. New underground stormwater drainage has nearly been completed in Zone 2 with the construction of the concrete pavements to commence in coming weeks. Construction in Zone 3 (across Bridge Street) will be undertaken in January 2017.

Steel reinforcement ready for the concrete pavement outside the Art Gallery

Pouring of the new charcoal feature concrete

Construction Staging

In consultation with local traders the construction staging and program has been refined to enable the new road pavements along Sixth Street to be completed in mid-December 2016. This will restore normal traffic conditions and parking availability prior to the Christmas period. To achieve this accelerated program, construction in Zones 2 and 4 are being undertaken at the same time. Construction in Zone 3 (across Bridge Street) will be undertaken in January 2017.

Open for Business

All local traders will remain 'open for business' throughout the construction works, with pedestrian access to shops and businesses available at all times. The staging of the works also means that there is plenty of parking available for visitors to the Sixth Street precinct. Please take the opportunity to visit your favourite shops on Sixth Street, and to watch the project unfold.

Let's Talk – 'Construction Zone'

You can view the latest news and images from the 'Sixth Street Revitalisation Project' in our 'Construction Zone' on our 'Let's Talk' page of Council's website.

Project Partners

The Revitalisation of Sixth Street is being delivered by Council, in partnership with the Australian Government through the 'National Stronger Regions Fund' and State Government's 'Planning and Development Fund'.
