# Swanport Wetland

## Community Update

June, 2017

The Rural City of Murray Bridge continually aims to improve the aesthetics of our parks, reserves and streetscapes.

Council's Environment Team through the Riverfront Strategy Quick Wins Program and Work for Dole team have upgraded the Swanport Wetland. The Swanport Wetland is one of our most significant wetlands and is located adjacent to the South Eastern Freeway.

Upgraded infrastructure includes 220 metres of rubble pathway, 150 metres of boardwalk, replacing fencing and the entry gate. New infrastructure items include 150 metres of rubble pathway creating a walking loop, a bird screen, interpretive signage, informative entry signs, bird roosts, a picnic table and an information board upgrade.
